PROFESSIONAL OVERVIEW

A versatile and proactive software engineer, I seek to bridge technical skills with multilingual communication to deliver IT solutions that meet business requirements and enhance user experiences. Acquainted with Agile Methodology and collaborative development design and implement secure, scalable, and user-centric applications with users always in mind. Eager to embrace new challenges, I am committed to continuous learning to keep pace with the fast-evolving IT industry.

SKILLS:

Technical skills: TypeScript/JavaScript, PHP, Go, C#, Linux Command, Data Structures and Algorithm, Big O, Agile Methodology and Scrum, AWS Cloud (EC2, S3, RDS, CloudFront, Route53, VPC)

Frontend: React.js, Next.js, Tanstack/React Query, Tailwind CSS, Angular, D3.js, Leaflet.js

Backend: Node.js, Express.js, Nestjs, Laravel, Prisma, Go, SQL, PostgreSQL, MongoDB, RESTful API, Postman

Design Tools: Adobe Creative Suite, Figma, User Research, Wireframe, Prototype, Information Architecture

Soft Skills: Teamwork, Communication, Growth Mindset, Presentation, Proactive, Time Management, Empathy,

Language skills: **Thai** (Native), **English** (Advanced: IELTS 7.5 | TOEIC 980), **French** (Intermediate: DELF B2), **Japanese** (Intermediate: JLPT N2)

WORK EXPERIENCE

Software Engineer

May 2025 – present

Classmethod (Thailand)

- Contributed to the development of the leading Japanese job platform in Thailand with over 10,000 registered Japanese-speaking users.
- Collaborated closely with the client to gather requirements and identify pain points, ensuring alignment with business needs.
- Implemented new features and resolved bugs with an emphasis on code readability, maintainability, and efficiency.
- Deployed updates and patches to the production environment, following best practices for version control and release management.
- Regularly communicated in Japanese with clients and management for project coordination, reporting, and meetings.

skills: Angular, Laravel, SQL, Docker, AWS, Kanban Board, Git and Version Control, Github, Japanese Language, Presentation, Problem-solving

Frontend Developer

August 2024 – January 2025

The Mather Co., Ltd.

- Collaborated closely with product owner and backend developers to create user-friendly and efficient **e-commerce web** application, with easy-to-use content management system to facilitate future content adjustment
- Wrote clean and reusable components, by separating contents for their usage to ease future readability, maintenance and scalability
- Implemented complex role-based web routing, enabling dynamic access control based on user roles defined during registration
- Utilized various tools and libraries such as tanstack query to help create visualizations such as bar graph, pie chart, and map, with interactivity

skills: React, Next.js, Tailwind, Tanstack Query, Antd, Leaflet.js, d3.js, BitBucket,

3D Animator

July 2022 – December 2023

Original Force Animation (Thailand), Thailand

- Created character and prop animations using hand-keyed techniques or by cleaning motion capture data, guided by animation supervisors and directors, to effectively convey intended stories or messages.
- Demonstrated disciplined work ethic under pressure across diverse projects, spanning TV series, commercials, and feature films

EDUCATION

Junior Software Developer Bootcamp Cohort 7

April 2024 – July 2024

Generation, Thailand

- Acquired skills in full stack development using MERN Stack (React, Node and Express, MongoDB), together with other soft skills such as Agile and Scrum methodologies, team collaboration, and presentation skills
- Designed and implemented **Elviro**, a mock furniture e-commerce web application, covering the full software development lifecycle—from user research, use case and data schema creation, UX design, to coding, testing, and deployment.

Bachelor of Fine Arts (Digital Arts: visual effects)

July 2018 – May 2022

Rangsit University, Thailand

First Class Honours (GPAX: 3.94)

CERTIFICATES

Google UX/UI Design Certificates (Coursera)

- Google's Foundations of User Experience (UX) Design
- Google's Start the UX Design Process: Empathize, Define, and Ideate
- Google's Build Wireframes and Low-Fidelity Prototypes

January 2024

February 2024

February 2024

Google Project Management Certificate (Coursera)

- Google's Agile Project Management Certificate (February 2024)

April 2024

ACHIEVEMENTS

Thailand's Gold Award, 24th Digicon6 Asia (Thailand)

May 2022

Oversaw short animation project: *Haikēi* as a co-director, and contributed as an animator and storyboard artist, using tools such as Autodesk Maya and Adobe Creative Suite.

Thesis, Creation and Invention Award, Rangsit University

July 2022

- Awarded the best thesis for the short 3D animation *Haikēi* by Rangsit University

Japanese Government Scholarship (MEXT): (Fully-funded Scholarship)

March 2015

- Fully-funded student by the Japanese Government to study Japanese Language and specialized training college in Japan.
- Participated in the local community to immerse in the local tradition and spread awareness of Thai cultures.

PROJECTS:

Salad Maker Web Application :

Fullstack Developer

Salad Maker is an intuitive web application that empowers users to craft personalized salad recipes by selecting from a wide range of fresh ingredients. Built using **Next.js** for the frontend and **Node.js** for backend services, the application leverages **MongoDB** as the database to efficiently store and manage ingredient data and user-created recipes.

Elviro E-Commerce Web Application :

Fullstack Developer/UX Designer

Elviro is a furniture e-commerce web application designed for starting families, offering modern, comfortable, and low-maintenance furniture in earth tones to reflect the brand's safety for clients and the environment. The web app is diagnose **100% Best Practice** and **up to 82% Accessibility** by Lighthouse

- **UX Design**
 - Conducted a user experience research and user persona, user journey and information architecture
 - Created a UX Design Prototypes in Figma, and made continual iterations over the design layout during development
- **Frontend:**
 - Adopted designs from Figma, converted them into clean code using HTML, CSS (Tailwind), and JavaScript with React, and seamlessly connected the frontend to backend APIs.
- **Backend**
 - Designed database and RESTful APIs, created data models using Node.js, Express.js, and Mongoose, utilized Postman for testing, and ensured CRUD operations interacted with MongoDB.
